

# National Healthcare Data Registry

## Cardiology

### Introduction

Join your peers in the development of the largest national Cardiology data registry available and help advance healthcare into the 21<sup>st</sup> century!

### Benefits

- **Low Cost.** As a Dr. Know Research Partner, you receive low-cost access to an advanced healthcare platform designed to make you more efficient, produce elegant reports, improve medical research, and automatically synchronize your consented data with the national registry.
- **Advanced Reporting.** Receive access to a growing suite of standardized Cardiology report modules. These modules understand grammar, sentence structure, and produce detailed, elegant, and easy-to-read final reports that understand their target audience. These modules help form the medical records pillar of your EMR/EHR solution and eliminate or greatly reduce any existing dictation and transcription costs.
- **Standardized, Yet Customizable.** Report modules are standardized and developed by industry experts. However, advanced customization features offer you a way to tailor these modules to your personal or organizational style. Users can also provide realtime feedback to module authors. As improvements are made, changes are transparently synchronized within the community.
- **Easy, Secure Integration.** This platform is designed to work with existing IT investments and can optionally integrate with most 3<sup>rd</sup> party software solutions through a set of simple interfaces.
- **Optimized Hardware.** Receive one *appliance server* – a hardware device specifically designed and pre-configured to run this platform efficiently at your site. This is a normal server, is owned by you, and will reside securely in any network environment. Built-in redundancy features help ensure your data is not lost in the event of a hardware failure.

### Requirements

- **Co-Ownership of Data.** In exchange for low-cost access to this platform, Dr. Know, LLC will co-own the consented data collected by this platform at your site. This data is secure and does not include patient identifiers, with the exception of a highly mathematically-protected version of the SSN required to unify medical records. In no way does this restrict your access to your data and if Dr. Know, LLC profits from the utilization of this data, you may as well.
- **Minimum Patient Consent Rate.** This platform has access to patient-consented data only. We understand that not all patients will provide consent, so we require sites to maintain a greater than 85% minimum consent rate.
- **Persistent Connection.** In order to provide a secure channel to the data registry as well as ongoing support and maintenance capabilities, a persistent Internet connection is required. This connection is secure and its utilization does not compromise the integrity of your network.

## Costs

This program has been designed to be as affordable as possible. While the software platform itself is provided free of charge, there is an initial hardware investment and a small annual fee associated with ongoing maintenance and support. The table below shows your total cost associated with this platform for both the first year and ongoing.

	Year 1	Year 2	Year <i>N</i>
Software Platform - <b>FREE!</b>	\$0.00	\$0.00	\$0.00
Appliance Server (Hardware)	\$2,000.00	\$0.00	\$0.00
Annual Maintenance & Support	\$1,500.00	\$1,500.00	\$1,500.00
<b>Total</b>	<b>\$3,500.00</b>	\$1,500.00	\$1,500.00

## How to Enroll

The enrollment process for Research Partners is straightforward. You must sign and fax back to us your completed paperwork and purchase your appliance server and first year support contract. Upon arrival, we will schedule a date with you to activate your device and bring your site officially 'online.'

We have prepared a web portal to guide you through this easy enrollment process:
